Sai Gon University

Major: Information Technology

Duration: 2022 – 2027

Projects

Store Management System (10/2025 – 12/2025)

Role: Full-stack Developer

Technologies: .NET 9, ASP.NET Core Web API, Blazor WebAssembly, EF Core, MySQL, Redis, Docker, JWT, Google OAuth 2.0, Cloudinary, MailKit.

Description: A full-stack **Store Management System** supporting multi-role operations (Admin, Staff, User), covering product management, inventory tracking, ... and payment workflows.

- **Architecture:** Built a scalable **3-layer architecture** (Controller → Service → Repository) with RESTful APIs for core business modules.
- **Security:** Implemented **JWT Authentication (Access + Refresh Tokens)**, **Redis token blacklisting**, **RBAC**, and **Google OAuth 2.0** login.
- **Admin Panel:** Developed a **Blazor WebAssembly Admin Dashboard** for managing products, users, orders, inventory, promotions, and analytics.
- **Features:** Built a promotion engine with validation rules, inventory tracking, and OTP-based password recovery via email using **MailKit**.
- **Infrastructure:** Integrated **Redis caching**, **Cloudinary media storage**, and **Docker Compose** for reproducible deployment.

Library Management System (09/2025 – 12/2025)

Role: Full-stack Developer

Technologies: C#, .NET 8, WinForms, Entity Framework Core, MySQL, RBAC

Description: A desktop-based library management system designed to streamline book cataloging, member administration, and borrowing/return operations.

- **Architecture:** Built with **N-Tier Architecture**, separating Presentation, Business Logic, and Data Access layers for maintainability.
- **Core:** Developed modules for **book management**, **member registration**, **inventory tracking**, and **borrowing/return workflows**.

- **Security:** Implemented **Cookie-based Authentication** and **RBAC** for secure access control.
- **Performance:** Optimized **EF Core queries**, applied **MySQL indexing**, and improved UI responsiveness with **Lazy Loading + reusable Blazor components**
- **Performance:** Optimized **EF Core queries**, applied **MySQL indexing**, and improved UI responsiveness with **Lazy Loading + reusable Blazor components**

Smart Food Tour Guide System (04/2026 – Present)

Role: Full-stack Developer

Technologies: React, Tailwind CSS, FastAPI, PostgreSQL (asyncpg), JWT, Web Speech API, Geolocation API.

Deployment: Vercel (Frontend), Render (Backend)

- **Architected** a geofenced audio guide system featuring multi-lingual **TTS (Text-to-Speech)** and a QR-based restaurant discovery workflow.
- **Implemented** GPS Geofencing using the **Haversine formula** to automate audio playback control based on user proximity (>20m).
- **Secured** the platform with **JWT Authentication** and **RBAC**, managing 3 distinct permission levels (Admin, Owner, User) with protected routes.
- **Optimized** backend performance using an **asynchronous FastAPI stack** and custom heartbeat middleware to manage concurrent user limits.
- **Developed** a real-time analytics dashboard for Admins to track active devices, scan metrics, and restaurant engagement trends.

Skills & Interests

Technical Skills

Programming Languages: C#, JavaScript, Java

Frontend: React, React Native, Tailwind CSS, HTML5, CSS3

Backend: Node.js (Express), .NET (ASP.NET Core), RESTful API Development

Database: PostgreSQL, MySQL, SQL

Tools: Git, GitHub, Postman, ngrok, Swagger

Languages

English: Able to read and understand technical documentation.
